> ***The day in one line.*** *6.24 h observed, 1,481 polls, 432 candidates, 0 cleared costs, 0 would have fired; 0 chases; best -0.000008 ETH on curious-umbral-gecko Juniper→Rowan Quay at 0.05 ETH.*

The study is monitor-only: it prices venues, quotes round trips with static calls and writes down what it saw. It holds no wallet and sends no transaction. Funding is decided by Christopher after the observed week, not by this page.

Candidates

A candidate is a poll whose executable spread after pool fees reached the floor (0%); each is quoted as a round trip across the size ladder with gas at the live price. "Cleared" means a rung paid after gas; "would fire" means it also met the bot's threshold (0.3%).

Costume: pairs and venues wear stage names (a house per exchange, a ward per fee tier); depths are scaled by a secret factor per pair. Counts, spreads, gas, hours and outcomes are the real study. Written Oct 31, 09:38 ET by the arbitrage lane's nightly report; the PDF beside it is rendered by this repository's workflow.
